

**SPECIFICATION**

PLEASE AMEND THE PARAGRAPH AT PAGE 10, LINES 24-28 TO READ AS FOLLOWS:

In the foregoing, when two or more of the Te, Bi and Sb are present, their concentrations in the alloy are independently within the disclosed ranges. Similarly, when two ~~[[ro]]~~ **or** more of  $\text{Te}^{+4}$ ,  $\text{Bi}^{+3}$  and  $\text{Sb}^{+3}$  ions are present in the electroplating bath, their concentrations are independently within the disclosed ranges.
